EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with D. J. Stockley on 04 March 2004.

The application has been amended as follows:

In claim 11, line 1, please replace "The method" with --The lithium battery--

In claim 12, line 1, please replace "The method" with --The lithium battery--

The following is an examiner's statement of reasons for allowance: The prior art of Miura et al. suggests a polymer gel electrolyte of a composition similar to that claimed by the applicants. However, the prior art provides no suggestion of motivation to form a lithium battery using the polymer gel electrolyte composition of Miura et al. in combination with a separator formed of an insulating resin sheet, sandwiched between electrodes.

The prior art fails to suggest a method for forming a lithium battery as claimed by the applicants, wherein a first solution of a terpolymer as claimed is mixed with a second solution of a lithium salt, and then forming a sandwich structure for the battery where the sandwich structure includes a separator and the mixed solution. Although Miura et al. describe a polymer electrolyte which is similar to the electrolyte material

claimed by the applicants, a method of forming the electrolyte from a polymer solution and a separate electrolyte solution is not considered to be obvious based upon the teachings of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
